We have a wide range of vertical options available for any room in the home. They are the perfect solution for covering large glazing areas and unusual shapes like bays and sloping windows. Our headrail and chain options come in a choice of four colours and you can upgrade your wand to a Brushed Silver finish.

BAY

Our Verticals can be fitted to a curved bay window. A single headrail seamlessly follows the curve of your window for a discreet and streamlined finish. The white headrail is supplied with a standard 89mm louvre width. Separate blinds fitted in a bay window allow you to open and close the blinds independently of one another, keeping you in control of the light.

HEADRAIL COLOURS

STABILISING CHAIN

SLOPING

For sloping windows, our Verticals are the perfect solution. The louvres are made to different lengths determined by the pitch of the window. Louvres are available in widths of 89mm or 127mm with a choice of white, black, brushed silver and anthracite headrail.

SPLIT DROP

We have different options for windows with varying drops. Depending on your window style, you can choose one headrail with different louvre lengths, or multiple headrails fitted to each section of the window, each with a different drop. Available in a choice of headrail colours and louvre widths.
